

Daikin Multi-Split solution

Less is more

One outdoor unit for multiple indoor unit connections

One solution, every room covered

When less truly is more

When it comes to choosing an air-to-air heat pump, also known as an air conditioner, most people go for the obvious setup. One indoor unit matched with one outdoor unit. But what if the smarter solution isn't the obvious one? Daikin's Multi-Split solution redefines efficiency and elegance by connecting multiple indoor units to a single outdoor unit. That means cleaner façades, quieter operation and smarter cost management, especially when more than one indoor unit is needed.

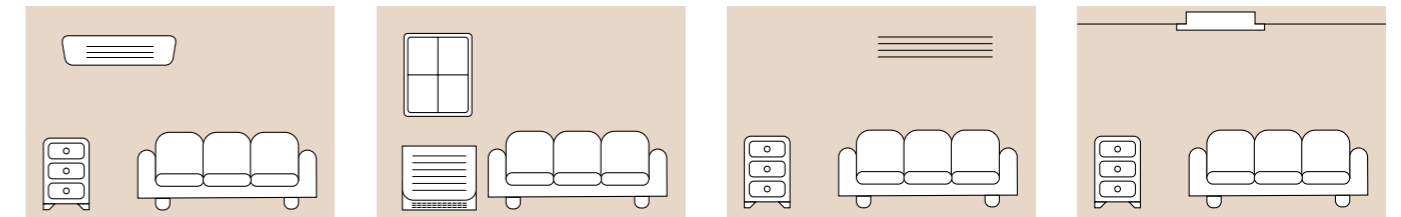

It's not just a technical upgrade. It's a lifestyle improvement. Choose a Multi-Split solution, because with less, you truly get more. Discover how:

Smart comfort, made to fit your home

Build your solution, your way

Step 1: choose your indoor units

Customise each room with the indoor unit that suits it best: wall-mounted, floor-standing, concealed or cassette.

Less

- Space**
Free up valuable outdoor space with just one outdoor unit, and achieve nicer aesthetics.
- Noise**
One outdoor unit means fewer decibels. Enjoy the quiet, inside and out.
- Time**
Faster installation thanks to simplified piping, wiring and setup.
- Cost**
A single outdoor unit lowers installation and maintenance costs. Choosing a higher port Multi supports future indoor unit expansion.

More

- Functionality**
Cover all your cooling, heating and even domestic water needs with just one outdoor unit.
- Choice**
Mix and match different unit types, colours and designs to suit every room.
- Efficiency**
Save energy with seasonal efficiencies up to A+++ in heating and cooling.
- Comfort**
Reliable, powerful performance. Even in extreme temperatures.

Step 2: add domestic hot water (if needed)

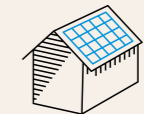

Pick the tank size based on your household:

- Up to 3 people
Wall-mounted 90 L or 120 L tanks. Water connections at the base, power and refrigerant on top. All settings at your fingertips via the intuitive interface.

- Up to 5 people
Floor-standing 180 L or 230 L tanks. All connections easily accessible from the top. Quick to install, simple to maintain, easy to use.

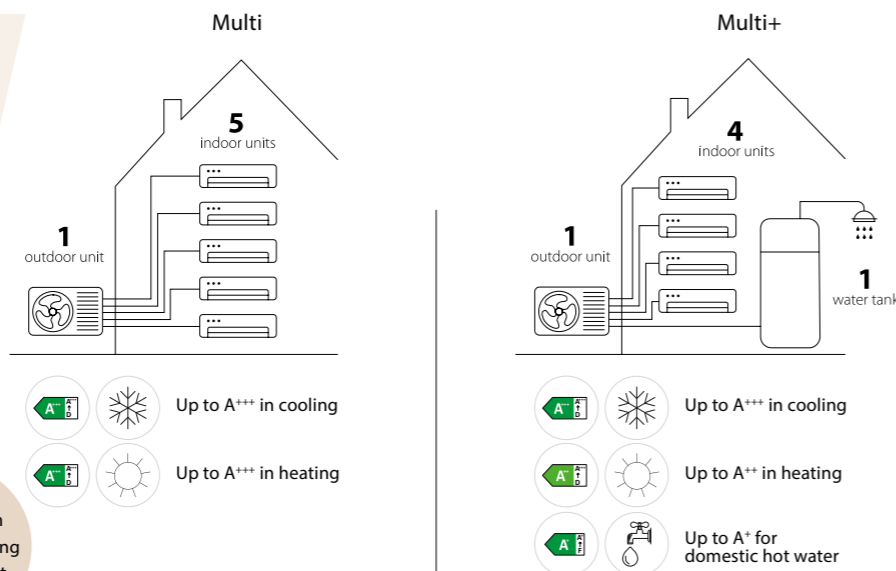

- Smart use of solar energy
With HomeHub and solar panels, your tank heats up automatically on sunny days. So warm water is always ready, while your home stays cool.

Two options:

Multi
for cooling and heating
(connects up to 5 indoor units)

Multi+
for cooling, heating and warm water
Connects one Multi+ outdoor unit to up to 4 indoor units and 1 hot water tank (90–230 L).

Unique:
A+++ in both heating & cooling in a Multi-split system

Step 3: share what matters most to you

Your installer will recommend the ideal unit combination:

Need just heating and cooling?
Go for a Multi outdoor unit with 2 to 5 ports.

2MXM-A8

3/4/5MXM-A8

Need heating, cooling and warm water?
Go for a Multi+ outdoor unit:

- 4-port Multi+ 4MXM-A9
Combine this 4-port Multi+ outdoor unit with 90 and 120 L tanks. Cools and heats up to 3 rooms.

- 5-port Multi+ 5MXM-A9
These 5-port Multi+ outdoor units work with 180 or 230 L tanks. Cools and heats up to 4 rooms.

Unlock the full potential of your Daikin Multi-Split solution

Maximise your freedom and flexibility

At Daikin, you'll find a wide range of indoor units to match your style and comfort preferences. Whether it's the award-winning design of Daikin Emura and Stylish, or the solid performance of Perfera and Comfora, there's a perfect match for every room. Choose from wall-mounted, floor-standing, or concealed ceiling units.

Opting for a Multi+ solution with domestic warm water? Then select a tank that fits your household: from a compact 80 L wall-mounted version to a 230 L floor-standing model.

For personalised installation advice, simply ask your installer.

Minimal maintenance, fewer worries

With Daikin Multi-Split, maintenance becomes noticeably simpler. One outdoor unit instead of several, means fewer components to install, fewer cables to connect and less to inspect. So you can worry less.

You save time and effort during installation and for years to come. Fewer parts also reduce the chance of technical issues, while keeping your indoor climate perfectly in check. Less hassle, more lasting comfort.

Keep installation simple and affordable

Installing climate control shouldn't be complicated. With a Daikin Multi-Split solution, one outdoor unit is all you need. Saving space, time and effort.

- Less clutter: avoid multiple units on your façade and free up valuable outdoor space.
- Fewer mounts: one unit means fewer supports and wall fixings.
- Faster setup: with just one system to install and configure, getting started is quicker and easier.
- More flexibility: longer piping options let you position indoor and outdoor units exactly where they fit best.

Extra possibilities, tailored to your comfort

Step into a system that adapts to your lifestyle. Whether you want to cool five rooms at once, manage each space individually, or plan ahead for future upgrades: Daikin Multi-Split brings you full comfort control from day one.

Control each indoor unit separately with the Daikin Onecta app.

Use low-capacity indoor units designed for small rooms, only possible with a Multi-Split system.

Planning to expand later? Simply choose a higher-capacity outdoor unit now and connect new indoor units when the time is right.

Your comfort, connected and cared for

Experience full control and personalised service, right at your fingertips. The Onecta app puts comfort in your pocket, Stand By Me keeps track of every step of your Daikin Multi-Split journey, and DCS Residential enables your installer to monitor and optimise your system remotely. Smart, simple and reassuring.

Stand By Me: your climate of security

Stand By Me gives you long-term peace of mind. This free online platform lets you activate extended warranties, track installation details and access trusted service partners. All from your browser. With secure remote monitoring and all system data in one place, it's your personal comfort hub, always ready when you need it.

Stand by Me, your online Daikin account for warranties, easy service bookings and full installation history.

Daikin Onecta app: stay in control. Anywhere, anytime

Manage your heating, cooling and domestic hot water settings remotely: room by room, unit by unit. Whether you're at home or on the move, the Onecta app keeps you connected:

- Adjust temperature and operation mode remotely.
- Change warm water settings, including fast-heating mode.
- Create daily schedules with up to six actions.
- Track room temperatures and operation status.
- View detailed energy usage by day, week or month.

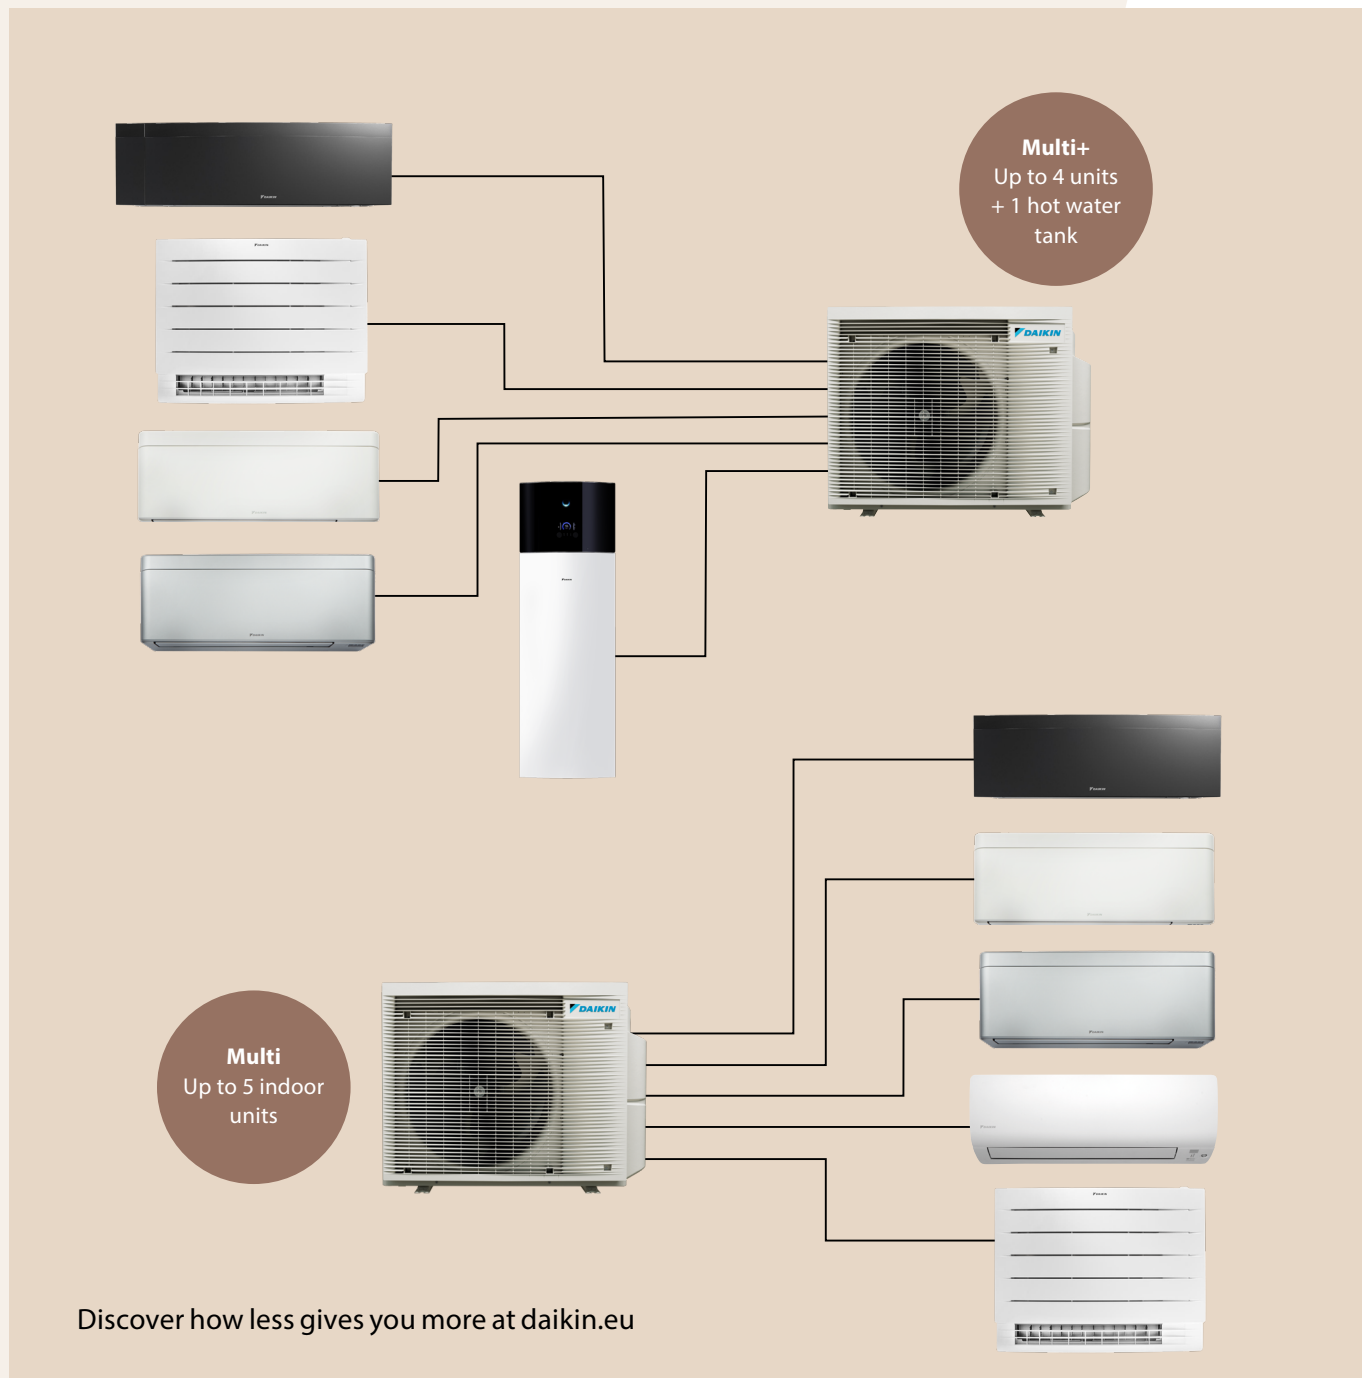

DCS residential: remote care, built in

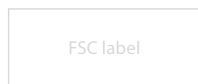

With Daikin Cloud Service for residential systems, your comfort is in good hands. Through before you notice a problem. Through secure remote monitoring, your Daikin installer can fine-tune settings, check performance and resolve issues from a distance. That means fewer service visits, faster support and continuous comfort throughout your home.

DCS Residential, a professional remote platform for proactive service and optimised comfort.

Multiple outdoor units? A thing of the past. Choose Daikin's Multi-split solutions.
