

Hi-Wall Fan Coil Unit

FWT-HT/HTV

BLDC fan motor
& advanced IAQ features

Fan Coil Unit

Best-in-class Indoor Air Quality

Designed to deliver exceptional comfort, outstanding efficiency, and superior indoor air quality. Each unit is powered by a high-performance **Brushless Direct Current (BLDC)** fan motor, providing cooling from 2.4 to 5.2 kW with whisper-quiet, energy-efficient operation.

- Thanks to advanced air purification technology, the system ensures cleaner, healthier air in any indoor space.
- The FWT-HT range includes two models: **FWT-HT** and **FWT-HTV**.
- The FWT-HTV version integrates 3-way valves for simplified installation and a streamlined design.
- Both models support wired or wireless controllers and can be easily integrated into a BMS system via an optional RS485 interface, offering flexible, intelligent control for any environment.

Green Building Certification: Supporting BREEAM & LEED Standards

	BREEAM					LEED	
Category	Management	Health & Wellbeing	Energy	Waste	Pollution	Energy & Atmosphere	Indoor Environmental Quality
Credits	Up to 4	Up to 4	Up to 9	Up to 2	Up to 1	Up to 4	Up to 1

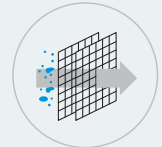

Benefits

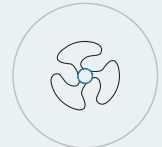

Enhanced energy efficiency & quiet mode with BLDC fan motor

Purified supply air thanks to **Flash Streamer technology**

Double filtration stage

Optimised comfort with Smart Fan Stop Control function

Instant cooling efficiency with **Turbo Mode** option
